Part 1

## FEATURE:

- Metal welded alloy and stainless steel load cell, excellent capability in moisture-proof, waterproof and anti-erosion
- High precision, high reliability, high stability. Good outline
- Accurately weigh light-load under heavy tare weight or light & dynamic variation-load under heavy net weight.
- Suitable in industrial weighing systems, such as hopper scales, quantity packing scales, batching. Scales, truck scales, railroad scales, ladle scales in metallurgy area and high heat crane scales

Technical drawing of a mechanical assembly. The drawing shows a vertical shaft with a pulley and a horizontal shaft with a pulley and a limiter. Dimensions are indicated as follows:

- $\varnothing A$ : Diameter of the top pulley.
- $\varnothing B$ : Diameter of the top pulley's hub.
- $K$ : Height of the top pulley's hub.
- $H$ : Total height of the assembly.
- $J$ : Height of the bottom pulley's hub.
- $\varnothing 25$ : Diameter of the bottom pulley's hub.
- $\varnothing C$ : Diameter of the bottom pulley.
- Limiter**: A component on the horizontal shaft, indicated by an arrow.
- $20$ : Length of the bottom pulley's hub.
