

evolution™

the power of intelligence

- ◆ Piece weighing, counting, checkweighing & 3-level pack run functions
- ◆ Advanced weighbridge programme with full database
- ◆ Comprehensive recipe formulation programme with 300 PLUs
- ◆ Superb graphics display for ultimate flexibility and ease of use
- ◆ Serial port, Ethernet & FieldBus connectivity
electronic archiving also available

E1205 Indicator

Avery Weigh-Tronix

The power of intelligence

If you want more effective management of weighing applications, lower costs and increased throughput in your business, look to Evolution™.

This intelligent indicator is designed to analyse, store, display and transmit data between applications and across networks - giving you greater visibility of process performance.

The E1205 is an advanced multi-function indicator designed for ultimate ease of use, providing all the flexibility and connectivity you need to control any weight-based process in your business.

- **Improve profitability** E1205 gives you the power to improve profitability and efficiency in numerous weighing processes across the food, pharmaceutical, chemical, logistics, mining, waste, metals and engineering industries.
- **Advanced multi-function value** The optimum solution for piece weighing, process control, checkweighing, counting and totalising.
- **Total weighbridge control** the indicator offers total control of your weighbridge operation. A comprehensive database allows you track vehicles, materials, suppliers and customers.
- **Recipe formulation - no problem!** Even complex recipe routines are trouble-free. The indicators hold 100 recipes of up to 50 stages each - plus 300 PLUs to store ingredients.
- **Manage packing runs** three levels of pack runs help you manage packing operations fully.
- **Flexible trips** up to 16 fully-configurable trips provide all the flexibility you need to manage a wide range of process control and formulation routines.
- **Accurate results - every time** the E1205 is designed to be the most operator-friendly indicators on the market. From simple weighing to process management, the graphical display gives clear results and prompts at every stage.
- **Ultimate ease of use** with five function keys to speed configuration and operation, the E1205 provides fast, error-free results. The alpha keypad is ideal for occasional use or alternatively, a PC keyboard can be connected for frequent data entry.
- **Complete connectivity** with inputs for up to 12 load cells, the indicators address the vast majority of weighing requirements - and can control a second weigh scale. The three internal 230 V-rated outputs can be expanded to up to 16 inputs/outputs via software.
- **Flexible communications** for communication to printers, PCs and other devices, the indicators offer two serial ports and Ethernet connectivity as standard. Two further optional serial ports and a Fieldbus connection of your choice may be added.
- **Robust design** Electronic design protects against weighing platform environmental surge voltages including ESD and provides communication port isolation.
- **Less downtime - lower costs** Intelligent design and PC-based service tools ensure rapid installation and configuration, reduced downtime and easy upgrading.
