

LOAD CELL CABLE

Specialist load cell cable is a must if you want to keep your system working at its optimum level, always insist on quality MK load cell orange cable. Our standard packing is 100metre packs to large 200metre rolls.

All MK cables are printed with MKCells logo to make sure the users can get the original one.

4 core cable can be used for 4 core load cells or general signal transmission.

6 core cables are suited to 6 core load cells, extension of 4 core load cells and connection to indicators where use of sense wires is desired to ensure there is no loss in accuracy that can be observed when the length of 4 core load cell cables is changed.
